SpecScout: Intelligent Smartphone Recommendation & Price Tracking Engine

Choosing the right smartphone is increasingly difficult due to fragmented specifications, fluctuating market prices, and overwhelming choices. SpecScout bridges this gap by offering a personalized recommendation system that aligns user-defined budgets and feature preferences with the ideal device. Beyond initial discovery, SpecScout introduces an automated price-tracking ecosystem designed to monitor e-commerce fluctuations and historical data, empowering users to make data-driven purchasing decisions at the exact right time.

Dashboard Overview: SpecScout-Dashboard.

Detailed Feature Breakdown

1. Global Navigation and Header

Sidebar Menu: Provides primary navigation through the application. It includes distinct sections for 'Dashboard', 'Find Phones' (currently active, highlighted in blue), 'Price Tracker', 'Alerts', 'My List', 'Comparisons', and 'Settings'.

User Header (Top Bar): Located at the top right, this section features a universal search bar for quick queries, a notification bell icon for immediate updates, and user profile access ('Alex R.').

2. "FIND YOUR PERFECT SMARTPHONE" Module

This primary section allows users to discover devices using granular criteria.

Filters Panel (Left Column):

• Brand: Selectable toggle chips for major manufacturers like Apple, Samsung, Google, and OnePlus.
• Price Range: An interactive dual-slider allowing users to constrain their search within a specific budget window (currently set between $200 and $1499).
• OS (Operating System): Quick selection toggles for iOS and Android platforms.
• Storage & RAM: Options to select desired memory capacities (e.g., 128GB, 256GB, 512GB for storage; 8GB, 12GB for RAM).
• Screen Size, Camera, Battery: Dropdown filters to specify physical dimensions and hardware power (e.g., 6.1" - 6.7" screens, 50MP+ cameras, 4000mAh+ batteries).

Results Area (Right Content Area):

• Displays the total count of matched devices ('Showing 18 Phones') along with grid and list view toggle icons.
• Product Cards: Individual listings for smartphones matching the filter criteria (e.g., iPhone 15 Pro, Samsung S24 Ultra, Google Pixel 8 Pro). Each card visually presents the phone, lists key specs (screen size, storage), and features primary action buttons to 'Track Price' (highlighted in blue) or 'Compare' the device.

3. "PRICE TRACKER DASHBOARD" Module

This section visualizes historical data and user-specific tracking metrics.

Tracked Phones Price Trends (Left Chart): A dynamic line graph showing the historical price fluctuations of a tracked device (e.g., iPhone 15 Pro). It charts price points over time (from January 1 to March 1), clearly visualizing price drops and spikes (e.g., starting at $1099, dipping to $999, rising to $1049, and settling back at $999).

Price Summary (Top Right Box): A quick-glance widget that contrasts the 'Current' price ($999) against the 'Lowest' recorded price ($979) over a user-selected timeframe (currently set to '3 months').

My Alerts (Bottom Right Box): A dedicated notification module displaying customized, user-defined triggers. Examples shown include conditional alerts like 'iPhone 14 Pro drop below $750' and event-based alerts like 'Galaxy S23 lowest price alert!'.
